Profile Summary

Senior Specialist – Product Handling with over 19+ years of experience across petrochemicals, polymers, phosphate, and oilfield services, delivering high-impact results in production, packaging, logistics, and plant operations. Proven leader in commissioning, turnaround management, and high-speed bagging and palletizing systems, driving operational excellence, safety compliance, and cost optimization. Expert in aligning production planning, maintenance, and commercial priorities to maximize plant uptime, product availability, and profitability. Known for leading cross-functional teams, optimizing inventory and spare parts strategies, and implementing continuous improvement programs that generate multimillion-SAR savings while strengthening quality, reliability, and customer service across complex manufacturing environments.

Leadership Impact Highlights:

- Delivered SAR 3.9M in total cost savings (2025–2026) by optimizing packaging, material usage, equipment utilization and driving TAM-2026 spare parts cost optimization of SAR 1.1M across bagging and palletizing operations.
- Recognized as “Substantially Exceeded Expectations” performer for four consecutive annual performance cycles (2022–2025), ranking among top performers in the department.
- Led APC TAM’26 turnaround for the bagging and packaging department, achieving a safe, on-time restart with zero major incidents and full production readiness.
- Won Innovation Awards (2016 & 2018) for automation and stretch-hood packaging projects generating over SAR 4.5M in recurring annual savings.
- Successfully commissioned and started up APOC product handling facilities, delivering 100% equipment readiness and stable commercial production.
- Achieved the 1-million-ton production milestone (Dec 2025) through reliability engineering, downtime reduction, and performance-driven operations management.

Top Skills

Product Handling & Packaging Operations

Petrochemical Plant Operations

Production Planning (PP & PDH)

Bagging & Palletizing Systems

Maintenance & Turnaround Mgt.

Cost Reduction & Budget Control

Commissioning & Start-Up Leadership

Warehouse & Logistics Management

Safety, Health & Environment (SHE)

KPI & Performance Management

Vendor & Contract Management

Career TimeLine

Senior Specialist – Product Handling
APC & APOC – Jubail Industrial City

PP & PDH Planner → Senior Specialist, Product Handling
Advanced Petrochemical Company (APC) – Jubail

Quality Assessment Mechanical Technician
Schlumberger Middle East – Dhahran

2025 – Present

2023 – 2025

2014 – 2023

2010 – 2014

2005 – 2009

Product Handling & Commissioning Lead
Advanced Polyolefins Company (APOC) – New Project

Production Planner & Economics
Ma’aden Phosphate Company – Jubail / RAK

Professional Experience

Senior Specialist – Product Handling
APC & APOC – Jubail Industrial City | **2025 – Present**

Achieved ‘Exceeded Expectations’
rating for four consecutive years

- Lead end-to-end bagging, packaging, palletizing, warehousing, and dispatch operations across APC and APOC, ensuring uninterrupted product flow from production to customer delivery in line with commercial and shipping commitments.
- Drive Safety, Health, Environment, and Quality (SHEQ) compliance by implementing robust procedures, conducting risk assessments, and enforcing operational discipline to achieve zero-incident and audit-ready operations.
- Develop and execute departmental business plans, budgets, and KPIs, aligning cost control, productivity, and service performance with corporate profitability and growth objectives.
- Manage and coach multi-skilled operations, maintenance, and logistics teams, ensuring strong capability building, workforce planning, and succession readiness through structured training and IDP programs.
- Oversee equipment reliability and asset performance for high-speed bagging, palletizing, and packaging systems, working closely with technical and reliability teams to maximize uptime and throughput.
- Lead continuous improvement and automation initiatives to reduce packaging costs, eliminate bottlenecks, and improve material handling efficiency across all product handling processes.
- Govern vendor performance, spare parts strategy, and service contracts, ensuring technical compliance, optimal inventory levels, and best-value procurement for critical packaging equipment.
- Establish and monitor real-time performance dashboards and scorecards, tracking output, downtime, quality, safety, and cost metrics to support data-driven management decisions.
- Champion innovation and digitalization by implementing new technologies and best practices to improve reliability, customer service, and operational excellence across APC & APOC.

Domain Exposure

■ Petrochemical & Polymer Manufacturing

■ Product Handling & Bagging Operations

■ Plant Operations, Commissioning & Turnaround

■ Production Planning, PP & PDH Operations

■ Industrial Logistics, Warehousing & Shipping

■ Oilfield Services & Mechanical Systems

Product Handling & Commissioning Lead

Advanced Polyolefins Company (APOC) – New Project | 2023 – 2025

- Led the end-to-end pre-commissioning, commissioning, and start-up of high-speed bagging, palletizing, and packaging systems, ensuring full operational readiness and seamless transition from project to operations.
- Coordinated with EPCs, OEMs, and technology partners (AVENTUS, PMT, KNK, TECHNIMONT) to align equipment design, installation, and performance with international packaging and safety standards.
- Directed Factory Acceptance Tests (FAT) in Germany, validating machine performance, throughput, and quality before shipment, reducing start-up risks and rework.
- Identified and resolved critical safety, quality, and production risks during the commissioning phase, securing stable operations and protecting plant start-up schedules.
- Optimized spare parts strategy, maintenance readiness, and operator training, enabling high equipment availability and reduced ramp-up downtime after handover.
- Drove punch list closure and technical issue resolution, ensuring on-time mechanical completion, successful handover to operations, and achievement of targeted production rates.

PP & PDH Planner → Senior Specialist, Product Handling

Advanced Petrochemical Company (APC) – Jubail | 2014 – 2023

- Led the monthly S&OP cycle, aligning demand forecasts, production plans, and inventory strategies across functions, improving forecast accuracy (MAPE) by 15% and enhancing service levels.
- Developed and implemented demand planning models and scenario analysis, enabling proactive response to demand variability and reducing stockouts by 20%+.
- Established data harmonization frameworks across SAP, Oracle, & WMS, creating a single source of truth & reducing planning cycle time by 20%.
- Designed and deployed KPI dashboards (OTIF, forecast accuracy, inventory turns), enabling data-driven decision-making and improving on-time-in-full delivery by 10–12%.
- Collaborated with commercial, finance, and operations teams to integrate demand signals, pricing inputs, and supply constraints, optimizing inventory levels and improving working capital efficiency by 15%.

Production Planner & Economics

Ma'aden Phosphate Company – Jubail / RAK | 2010 – 2014

- Led production planning and scheduling across four phosphate processing plants, balancing capacity, feedstock, and market demand to achieve targeted output and operational efficiency.
- Managed plant performance, downtime, and consumption reporting in Oracle ERP, ensuring accurate data for month-end closing, cost control, and management reporting.
- Supported pre-commissioning, commissioning, and startup activities, ensuring stable ramp-up and smooth transition to full-scale operations.
- Developed and maintained SOPs, IMS, and ISO systems (ISO 9001, 14001, 50001, OHSAS 18001), strengthening compliance, safety, and operational discipline.
- Served as Certified Internal Auditor and IMS Facilitator, conducting audits, closing gaps, and driving continuous improvement across operations and maintenance.
- Provided economic analysis and operational support to production and maintenance teams, identifying efficiency improvements and cost-reduction opportunities.

Quality Assessment Mechanical Technician

Schlumberger Middle East – Dhahran | 2005 – 2009

- Performed mechanical inspection, testing, & quality verification for drilling tools, MWD, LWD, and power drive systems used in Saudi Aramco operations.
- Conducted failure investigations and root cause analysis, supporting corrective actions to improve equipment reliability and reduce non-productive time.
- Executed preventive and corrective maintenance on oilfield tools, ensuring compliance with Schlumberger quality and safety standards.
- Supported service quality and extender teams, maintaining accurate mechanical logs, inspection records, and compliance documentation.
- Participated in field and workshop troubleshooting, resolving technical issues under high-pressure drilling environments.
- Ensured strict adherence to HSE and quality procedures, contributing to safe, reliable, and audit-ready oilfield operations.

Tools & Technologies

- **ERP & Operations Systems** : SAP PP/MM, Oracle ERP, Production Planning, MRP, Maintenance & Materials Planning
- **Product Handling & Packaging Technologies**: High-Speed Bagging Lines, Palletizers, Stretch Hood Systems, Automated Weighing & Filling Systems
- **Warehouse, Logistics & Maintenance Tools**: WMS, Inventory Control, CMMS, Spare Parts & Asset Tracking, Dispatch & Shipping Systems
- **Performance, Safety & Compliance Platforms** : KPI Dashboards, MIS Reporting, SHE Systems, ISO & IMS, Permit-to-Work, Audit & Quality Management

Education Details

Bachelor's Degree in Business Administration
King Abdulaziz University – Saudi Arabia

Skyguard 35mm Course
Royal Saudi Air Defense Force Institute | Jeddah

Professional Training & Certification

Advanced Strategic Management

Business Process Analysis, Mapping & Modeling

Crisis Management

Performance Measurement, Continuous Improvement & Benchmarking

ISO & Internal Management Systems Auditing

Warehouse, Inventory & Freight Management

Leadership Excellence & Innovation

Supplier Relationship Management

Customer Service & Marketing

Sustainability & Organizational Strategy
